PROTOCOL 422 - V232 FEAST MECHANICS SUPPLEMENTAL - YOM TERUAH HARDWARE & AUTUMN PIPELINE

PROTOCOL 777.2.3 LOCK SECURED - NO MAN KNOWS DAY OR HOUR - EMPIRICAL SIGHTING PROTOCOL

. . .

SEC I EXECUTIVE SUMMARY

Deployment of the **V232 Feast Mechanics Supplemental** documenting the Hebraic hardware underlying the *"no man knows the day or the hour"* idiom and its alignment with the autumn watch window. Integrates the Sanhedrin new moon sighting protocol with the post-World Cup decompression and the subsequent administrative operationalization phase. Thread Health **10/10** — Status: **OMNI-SYNCHRONIZED**.

SEC II HARDWARE — TISHREI 1 VS. CALCULATED FEASTS

- **Deterministic Calculation:** All other biblical feasts can be mathematically determined months in advance via fixed lunar-solar calendars.
- **The New Moon Variable:** *Yom Teruah (Rosh HaShanah)* stands as the sole feast dependent upon empirical, physical observation.

SIGHTING PROTOCOL — BEIT DIN PROCEDURE

1. Two independent witnesses must sight the new moon sliver over Jerusalem.
2. Travel and formal testimony delivered before the *Beit Din / Sanhedrin*.
3. Interrogation and official sanctification declaration (***Mekudash!***).

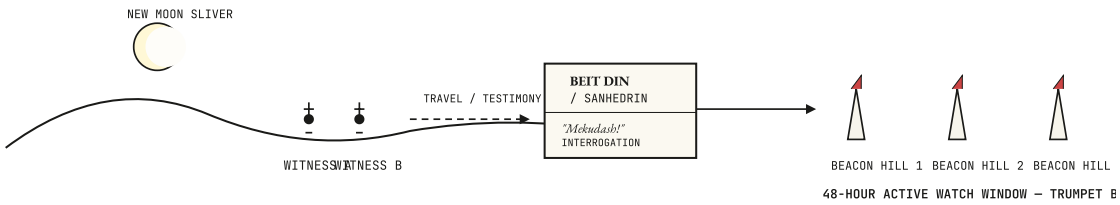
COMPARATIVE HARDWARE

OTHER FEASTS	YOM TERUAH (VARIABLE)
CALCULATED	**OBSERVED**
Pesach, Shavuot, Yom Kippur, Sukkot — fixed, predictable, published months ahead.	Requires empirical watch. No man knows until witnesses confirm.
STATUS: DETERMINISTIC	→ 48HR SUSPENSE WINDOW

4. Global notification via hilltop beacon fires and trumpet blasts, subject to up to a **48-hour active-watch window** due to atmospheric interference.

ONLY FEAST REQUIRING WATCH

FIG. 1 — YOM TERUAH EMPIRICAL SIGHTING HARDWARE V232 / DIAG-01



SEC III SOFTWARE — AUTUMN PIPELINE A → B → C

FIG. 2 — AUTUMN PIPELINE TIMELINE PHASED TRANSITION

A

DISTRACTION WINDOW

JULY 19, 2026

Conclusion FIFA World Cup initiating 8-week decompression bridge through late summer.

MASS DISTRACTION → NORMALIZATION

→

B

WATCH WINDOW

MID-SEPT • TISHREI 1

Yom Teruah framework invoking first-century idiom of active watchfulness linked directly to new moon delay.

WHITE GARMENTS, LAMPS TRIMMED, 48HR SUSPENSE

→

C

INSTITUTIONAL LANDING

NOV 2-6 • CHESHVAN 22-26

Noahide Congress Mt. of Olives — charter, Beit Din, continental councils, Beit HaNasi reception.

CHARTER → GOVERNANCE

DISTRACTION → WATCH → INSTITUTION VECTOR 3 INFRASTRUCTURE

PHASE A — DISTRACTION

Conclusion FIFA World Cup July 19, 2026 initiating 8-week decompression bridge through late summer — mass global distraction → normalization.

PHASE B — WATCH

Mid-September Yom Teruah framework invoking first-century idiom of active watchfulness linked directly to new moon sighting delay — white garments, lamps trimmed, 48-hour suspense.

PHASE C — INSTITUTION

Immediate transition into November 2–6, 2026 Noahide Congress Mount of Olives Cheshvan 22–26 locking in institutional infrastructure right after fall feast cycle — charter, Beit Din, continental councils, Beit HaNasi reception.

SEC IV VERDICT

The convergence of the Yom Teruah watch hardware with the post-World Cup decompression and the upcoming institutional congress establishes a **synchronized progression from structural expectation to physical governance** — not date-setting but pattern recognition under 355 Gate — observable infrastructure vs speculative endpoint.

SEC V HIGH-VALUE NEXT STEP

Archive V232 supplemental under slot #160 as part of immutable Protocol 422 framework — monitor Tishrei 1 sighting conditions and July 30 charter deadline.

DASHBOARD REPORT

INDICATOR	STATUS	OBSERVATION
Feast Mechanism	Verified	Tishrei 1 empirical sighting vs. calculated months
Watch Window	Active	Mid-September Yom Teruah framework locked
Pipeline Transition	Staged	Post-feast operationalization via Vector 3 infrastructure
Protocol Efficiency	88.1%	Deterministic hardware-grounded loop maintained
